

CREMA CREAM - CRÈME
Emoran[®]

PER ATTENUARE I DISTURBI DELLA SINDROME EMORROIDARIA
FOR THE RELIEF OF SYMPTOMS ASSOCIATED WITH HAEMORROIDS
POUR ATTÉNUER LES TROUBLES RELATIFS AUX HÉMORROÏDES

Emoran[®] Crema è una crema utile per attenuare i disturbi della sindrome varicosa emorroidaria (emorroidi).
Emoran[®] Crema coadiuva ad alleviare prurito e bruciore e svolge un'azione protettiva, lubrificante e rinfrescante, conferendo alle parti interessate una sensazione di sollievo e benessere.
Per le sue capacità emollienti aiuta, inoltre, a prevenire irritazioni e congestioni della zona peri-anale.

Emoran[®] Crema è indicato:

- nei casi di disturbi associati alla sindrome varicosa ano-rettale
- in presenza di emorroidi
- in presenza di proctiti quali prurito, bruciore e dolore
- in via preventiva nell'insorgere di irritazioni e congestioni

Emoran[®] Cream is a cream useful to mitigate the troubles of hemorrhoids syndrome.

Emoran[®] Cream soothes the itching and burning and provides a protective, lubricating and refreshing action giving to painful areas a feeling of relief and wellness.

Thanks to its emollient properties, it helps to prevent the rise of irritations and congestions of peri-anal area.

Emoran[®] Cream is indicated:

- in case of troubles related to varicose anus-rectal syndrome
- in presence of hemorrhoids
- in presence of proctitis as itching, burning and pain
- for preventing the rise of irritations and congestions of peri-anal area
