Podophyllum Resin Topical Solution

» Podophyllum Resin Topical Solution is a solution in Alcohol consisting of Podophyllum Resin and an alcoholic extract of Benzoin. It contains, in each 100 mL, not less than 10 g and not more than 13 g of hexane-insoluble matter.

[**Caution**—Podophyllum Resin Topical Solution is highly irritating to the eye and to mucous membranes in general.]

Packaging and storage—Preserve in tight, light-resistant containers.

Identification—

A: A 1 in 5 solution in chloroform is levorotatory.

B: The precipitate obtained as directed in the test for *Hexane-insoluble matter* responds to *Identification* test A under *Podophyllum Resin*.

ALCOHOL DETERMINATION (611): between 69.0% and 72.0% of C_2H_5OH .

Hexane-insoluble matter—Using a 10.0-mL quantity of the Topical Solution, proceed as directed for *Hexane-insoluble matter* under *Podophyllum Resin*. Multiply the weight of hexane-insoluble matter found by 2.5 to find the amount present in the 10.0 mL taken.

Auxiliary Information - Please [check for your question in the FAQs](#) before contacting USP.
